

PARTICIPANTS NEEDED FOR RESEARCH STUDY ON GENETICS AND DEVELOPMENTAL DISABILITIES

We're conducting a research study that will look at foster parents' knowledge and perceptions of genetic services for children with developmental disabilities. Many children with developmental disabilities get genetic testing and/or meet with a genetic counselor. Through this study, we hope to learn how to improve education about genetics and genetic services to better meet the needs of foster parents.

Participation involves a single **20-minute online survey**. Those who complete the survey will have the option to enter a raffle drawing for a chance to win one of ten \$25 Amazon gift cards. If you are interested in this study, **scan the QR code with your phone or follow the link below to the survey.**
